Connection diagram

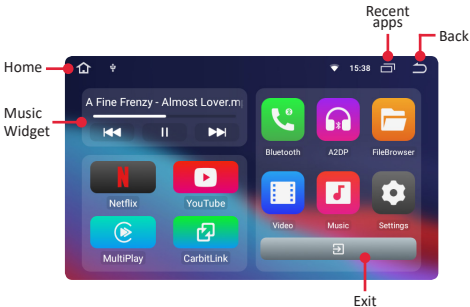

or

NOTE! The adapter should be plugged into the USB port that is for wired Apple CarPlay connecting if there are multi USB ports in your car.

User interface

- **MultiPlay:** app for wireless CarPlay & Android Auto
- **CarbitLink:** app for wireless screen mirroring
- **Bluetooth:** Bluetooth hands-free talking for iPhone and Android smartphone
- **A2DP:** Bluetooth audio streaming
- **Music & Video:** apps for USB flash drive multimedia playback

Quick settings

- **Connect to WiFi network**

Go to settings > Network & Internet > Wi-Fi.

- **Pairing your mobile phone with Bluetooth**

Enable your mobile phone's Bluetooth, next open Bluetooth app on adapter.

4 Enter pair code **0000** on your mobile phone to finish pairing.

● Setting up wireless CarPlay/Android Auto

Pair your iPhone/
Android smartphone
to adapter's
Bluetooth first.

Open MultiPlay app. Tap
confirm if there are pop-
up notifications on your
phone.

NOTE! Using wireless CarPlay
or Android Auto will disable the
adapter's WiFi network function.

TIPS! Disable [wireless auto connect] in MultiPlay
app settings if you don't want to automatically start
wireless CP/AA every time you pair to Bluetooth.

Firmware update

1

Format USB flash drive into FAT32.

2

Copy update.zip to the root folder of USB flash drive.

3

Insert the USB flash drive into the adapter then power on. Tick [Wipe data and format flash], next tap install.

4

The green light flashes rapidly while updating.

5

After the update is finished, the system will restart. Delete the update.zip file or remove the USB flash drive.
